

imagine unified communications...

Telephone systems for BUSINESS CENTRES....

### Offer something unique to your prospective tenants

You can offer extensions at tenant's homes or other offices using VoIP. We can install a TDM, Analogue, and/or IP solution to fit all needs.

### Making each tenant's business appear autonomous

We have the experience to provide sufficient line capacity for all while minimising your line rental spend.

### Easy billing

Each tenant can be billed for its telephone usage from simple to detailed reports. The billing reports can even be automated to go directly to tenants via e-mail.

### Centralised Answering

Where a tenant's office is unmanned the calls can be redirected to centre staff, or to centralised voice mail so that the important call is always dealt with.

### Your Facilities Management will be industry leading

We can help or train your centre staff to move a new business into a suite quickly & effectively. Many business centre managers prefer us to liaise directly with newly won tenants. You have the choice and we are here to help.

### Some of Abbey Telecom's customers:

- Blackburn Enterprise Centre (for Blackburn with Darwen Borough Council)
- Futures Park (Bacup)
- Warren Bruce Court (for Manchester Solutions)
- County House (Plymouth)
- Facilitate (Brighton)
- Windermere Business Centre (Cumbria)
- AU Business Centre (Bury)
- Kingfisher Centre (Rawtenstall)

### Any business any size

The modular design of the OfficeServ 7000 platforms means there is a solution with the same features and functions for every size of organisation. The OfficeServ product range features a common set of handsets and applications,

- OfficeServ 7100 - for the small business
- OfficeServ 7200 - for mid-sized organisations
- OfficeServ 7400 – for Business Centres or the Head Office of a national chain & multi-site organization
