

imagine unified communications... for the RECRUITMENT INDUSTRY.....

Record calls at a fraction of the usual cost

The ability to record all inbound or outbound calls & transfer them to email is a simple & low cost feature. You have a permanent record of what the caller agreed to. Never again can clients avoid paying for those verbally agreed temp bookings.

Your clients calls get answered before candidate calls

Samsung OfficeServ 7000 can identify your clients and will automatically prioritise them depending on the importance of the caller. So even if there are a number of candidate calls awaiting answer we can set your system to give priority to a client call.

Direct Dialing for Temps/Accounts

Calls are immediately directed to staff dealing with permanent, temporary, clerical, teaching, etc ensuring that the enquirer gets answered quickly by the right person.

Use tracking phone numbers to isolate which marketing activities produce the best results

By tracking where your calls originate you can identify which of your routes to market is the most effective & reduce your spend in non-responsive areas.

Our recruitment industry customers range from small to large:

- F M Recruitment (London W1)
- Premier Consultants (London W4)
- Claire Gibson (Blackburn & Chorley)
- Key Stage (Blackburn & Lancaster)
- G Force Employment (Bicester)
- Xpress Solutions Recruitment (Oldham)
- Pheonix Way (Manchester)
- Professional Recruitment (Bolton)
- People First (York)

Any agency, any size

The modular design of the OfficeServ 7000 platforms means there is a solution with the same features and functions for every size of organisation. The OfficeServ product range features a common set of handsets and applications.

- OfficeServ 7100 - for the small agency
- OfficeServ 7200 - for mid-sized businesses
- OfficeServ 7400 - for large corporations or the Head Office of a national chain & multi-site agencies
