

# imagine unified communications... for EDUCATION CENTRES....

### Urgent assistance in the class room

We understand that teachers & helpers may sometimes find themselves in a threatening situation.

That is why we have developed a function to send an "Emergency HELP" call to reception when a classroom handset is knocked off the hook and no buttons are pressed over a set period of time. Reception will rapid ring with the classroom in screen so that help can be sent.

### Dictation Systems for Education

With voicemail to e-mail gateway you can e-mail voice messages amongst staff which can be listened to via any standard PC based media player allowing the user to play, pause, rewind & fast forward through the message. This is a low cost option and Abbey Telecom have used this in the past to save schools thousands of pounds on specialist dictation equipment.

### When a student or parent leaves a message they can be certain we will get it

The ability to record all inbound or outbound calls & transfer them to email is a simple & cost effective feature. You have a permanent record of what was agreed to, and you can email the recordings to email recipients anywhere.

### Minimise your costs

We know that education budgets are not generous so we ensure you get the facilities you need within your budgetary constraints.

### Absence Hotline

Relieve the pressure on your receptionist by setting up an Absence line with messaging. All absence messages can then be emailed to the receptionist and can be played back through any standard media player at leisure.

### Some of Abbey Telecom's customers:

- St Mary Magdalene Primary (London)
- Loose Infants School (Maidstone)
- Albany Science College (Chorley)
- Palatine High School (Blackpool)

for Blackburn with Darwen Borough Council:

- Blakewater College
- Beardmore Humanities College
- Darwen Vale High School
- Higher Croft Children's Centre
- Shadsworth Children's Centre
- many more.....

### Any education establishment, any size

The modular design of the OfficeServ 7000 platforms means there is a solution with the same features and functions for every size of organisation. The OfficeServ product range features a common set of handsets and applications,

- OfficeServ 7100 - for the small school
- OfficeServ 7200 - for mid-sized schools
- OfficeServ 7400 - for Academies, Universities & multi-site establishments.
